

Chapter:7

(Moving Coil Instruments)

Lecture:1

Moving Coil Instruments Definition:

- There are two types of moving coil instruments namely, permanent magnet moving coil type which can only be used for direct current, voltage measurements and the dynamometer type which can be used on either direct or alternating current, voltage measurements.

Types of Moving Coil Instruments

- There are two types of moving coil instruments namely,
 1. The permanent magnet moving coil type which can only be used for direct current, voltage measurements&
 2. The dynamometer type which can be used on either direct or alternating current, voltage measurements.
