Daffodil Institute of IT, Chittagong

Geometric Design

- All the elements such as pavements cross section, riding surface details, sight distance requirement, horizontal and vertical alignment, manoeuvre areas and intersections and parking facilities are to be suitably designed for better performance.

Administrating and Managment

- Traffic department is administrating and managing the traffic. Traffic police are guiding and enforcing traffic discipline. Traffic laws and regulations are enforced for traffic management. Traffic engineering division deals with improvement of road geometrics, providing additional road facilities and installation of suitably designed traffic control devices.

Thanks
