MY SQL Where Clause

1. The WHERE clause is used to filter records.
2. It is used to extract only those records that fulfill a specified condition.

3. WHERE Syntax

```
SELECT column1, column2, ...FROM table_name WHERE condition;
```

4. SELECT * FROM Customers

   WHERE Country = 'Mexico';

   The following SQL statement selects all the customers from "Mexico":

5. SELECT * FROM Customers WHERE CustomerID = 1;
